

Kelco Cabinets Launches Free Online Kitchen Remodel Cost Estimator

August 24, 2026

SPRINGFIELD, MO - August 24, 2026 -

Kelco Cabinets LLC, a custom cabinetry and remodeling company based in Springfield, Missouri, has launched a free online tool that gives homeowners an early cost projection for kitchen cabinetry projects before scheduling a consultation. The estimator is available now through the company's website and is intended to help homeowners understand potential project costs earlier in the planning process.

The kitchen remodel cost estimator works by asking homeowners to enter basic details about the space and the scope of the intended project. Users provide information such as the size of the kitchen, the type and quantity of cabinets under consideration, and related selections such as countertops, flooring, and backsplash. After the information is submitted, the tool returns a projected cost range based on the entries, giving homeowners a working figure to reference before any in-person meeting takes place.

According to the company, the tool is not a binding quote. Instead, it produces an approximate range that reflects the choices a homeowner enters, which can then be refined during a formal consultation with the

company's team. The figures are meant to serve as a starting point for planning rather than a final price.

The estimator is part of a broader effort by Kelco Cabinets to provide customers with clearer information earlier in the remodeling process. Homeowners planning a kitchen project often face uncertainty about budgets before speaking with a contractor, and the tool is designed to address that gap by putting a general figure within reach at the outset.

"Homeowners often want a sense of the numbers before they commit to a meeting, and this tool gives them that starting point," said Preston Kelsch of Kelco Cabinets. "The estimator reflects the selections someone enters, so it moves the budget conversation earlier in the process rather than leaving it until the end."

Kelsch noted that the estimator reflects the way many homeowners now begin remodeling projects. "People are doing more research on their own before they reach out," he said. "Providing a cost range up front respects that, and it helps set expectations so the consultation can focus on design and details rather than surprises about budget."

The tool covers cabinetry-focused kitchen projects, including custom cabinets, countertops, flooring, and backsplash installation. It is available to homeowners throughout the areas the company serves in Southwest Missouri, including Springfield, Bolivar, Willard, Ozark, Republic, Battlefield, Nixa, Branson, Stockton, Pleasant Hope, and Rogersville.

Kelco Cabinets is a custom cabinetry and remodeling company based in Springfield, Missouri. The company specializes in kitchen and laundry room remodeling, along with custom cabinets, countertops, flooring, and backsplash installation for both new construction and existing homes. It serves Springfield and surrounding communities in Southwest Missouri. Additional information about its services is available through Kelco Cabinets and the company's website.
