

Control Point Heating ? Cooling ? Plumbing ? Electric Introduces Quilt Heat Pump

August 26, 2026

SHREWSBURY, MA - August 26, 2026 -

Control Point Heating ? Cooling ? Plumbing ? Electric has introduced the Quilt heat pump to its range of heating and cooling solutions. The family-owned company, founded in 2007, now offers this energy-efficient heat pump as part of its ductless and heat pump installation services for residential properties.

The Quilt system is a ductless heat pump designed for room-by-room climate control. It consists of indoor units, an outdoor unit, a control dial, and supporting software. The equipment transfers heat rather than generating it through combustion, supporting efficient operation for both heating and cooling. Control Point Heating technicians install and service the systems, drawing on the company's established experience with heat pumps and related HVAC equipment.

Nick Lupo founded the company in 2007 with a focus on reliable service delivery. Control Point Heating ? Cooling ? Plumbing ? Electric provides heating, cooling, plumbing, and electrical solutions. Its team of technicians holds more than 286 years of combined industry experience. The addition of the Quilt heat pump expands the options available for energy-efficient upgrades.

Installation of the Quilt system involves placement of compact indoor units and an outdoor unit, along with controls that allow individualized temperature settings. The company can coordinate these installations with existing ductless or heat pump work and assist with available energy rebate processes. Control Point Heating participates in programs that support energy-efficient equipment, applying credits where applicable during project planning.

Lupo continued, "Offering the Quilt heat pump allows the company to provide an additional energy-efficient option that fits within our existing heat pump and ductless services."

Nick Lupo noted, "This introduction continues the company's practice of incorporating equipment that aligns with current efficiency standards and customer requirements."

Control Point Heating ? Cooling ? Plumbing ? Electric maintains full licensing and insurance along with EPA certification. Its core operating principles of accountability, initiative, solution-oriented thinking, customer focus, and employee wellness guide project execution and staff development. Regular training keeps technicians current with installation methods and system requirements across heating and cooling equipment.

In addition to the Quilt heat pump, the company handles gas furnaces, boilers, geothermal heat pumps, conventional heat pumps, air conditioning systems, zone controls, and related components. Plumbing and electrical services support coordinated work when projects involve multiple systems. The VIP Club maintenance program provides scheduled inspections and adjustments that help maintain performance of installed equipment over time.

The integrated service model enables technicians to address interconnected heating, cooling, plumbing, and electrical needs within individual projects. Control Point Heating ? Cooling ? Plumbing ? Electric has adapted to changes in technology and efficiency standards throughout its history. The introduction of the Quilt heat pump adds another choice for properties seeking ductless heat pump solutions.

Energy-efficient heat pumps, such as the Quilt system, play a significant role in reducing overall energy use by effectively moving heat around rather than producing it from scratch. Ensuring proper installation and ongoing maintenance is crucial for supporting consistent operation and longevity of the system. The company is dedicated to continuously evaluating and incorporating advanced equipment that meets current performance expectations while upholding high standards of workmanship and service quality.

Control Point Heating ? Cooling ? Plumbing ? Electric is a family-owned business founded in 2007, specializing in HVAC, plumbing, and electrical services. With extensive team experience, the company delivers comprehensive solutions for residential and commercial properties.
