

Keighley Dental Implants Practice Launches Expanded Implant Consultation Slots at Taylored Dental Care

September 11, 2026

KEIGHLEY, UK - September 11, 2026 -

Taylored Dental Care Keighley has reported an increased number of implant consultation slots in the dental practice diary from 9 September 2026. This new drive aims to improve the quality of life for people suffering from missing teeth. The expanded availability means more patients in Keighley and surrounding towns and villages can now access dental implant consultations.

Missing teeth affect more than appearance. Gaps left by lost teeth can alter bite patterns, place additional strain on surrounding teeth, and in some cases lead to gradual bone loss in the jaw where the root once sat. Dental implants address this by replacing the missing root with a titanium post placed directly into the jawbone. Once the post integrates with the surrounding bone through osseointegration, a crown, bridge, or full arch of replacement teeth is fitted on top, restoring function and appearance in a fixed rather than removable arrangement. Suitability depends on a clinical assessment of jawbone density, gum health, and overall oral health, with the treating clinician outlining any requirements during the consultation.

A 2025 study titled "Outcomes of Dental Implants in Routine Clinical Practice: A Retrospective Multicenter Study" (DOI: 10.1155/ijod/9930477), published in the International Journal of Dentistry and coordinated in Milan, Italy, reported an implant survival rate of 99.9% across a specific retrospective sample of general implant placements. Conducted by Goker F, Mali Rai P, De Santis D, and colleagues, the study found that following guidelines including accurate diagnosis, personalised treatment plans, ongoing maintenance, and adherence to the implant system manufacturer's recommendations led to satisfactory clinical and radiographic outcomes. These findings relate to implant placements generally and should not be interpreted as representing expected outcomes for all patients or for treatments carried out at Taylored Dental Care Keighley.

Dr Carl Taylor, Principal Dentist at Taylored Dental Care Keighley, remarked that consistent appointment availability is something the practice takes seriously. "People in Keighley shouldn't have to wait long to find out whether implants are right for them," he noted. "Earlier access to a consultation generally means earlier answers, and that matters when someone has been living with missing teeth for some time."

Single tooth dental implants address situations where one tooth is missing. A titanium post is placed at the site of the missing tooth and a crown fitted on top, matched to the surrounding teeth in appearance and function. The treatment avoids the need to alter or use adjacent teeth as anchors, as would be necessary with a traditional bridge.

For patients with more extensive tooth loss, All-on-4 dental implants offer a full-arch replacement option using four titanium posts to support a complete set of replacement teeth. Anatomical suitability varies between patients and can only be confirmed through individual clinical assessment, with the treating clinician outlining the most appropriate pathway during the consultation.

Consultations begin with a thorough examination of the teeth, gums, and jaw, with scans and imaging taken where clinically indicated. The implant dentist will discuss clinical considerations relevant to each patient's individual situation, ensuring decisions are made with a full understanding of what treatment involves and what to expect at each stage.

In-depth information about All-on-4 dental implants at Taylored Dental Care Keighley is available at: <https://tayloreddentalcare.co.uk/keighley/dental-implants/all-on-4-dental-implants/>.

Nervous patients are welcome at Taylored Dental Care Keighley. Dr Carl Taylor and the practice team take additional time with patients who experience anxiety around dental visits, adapting the pace of appointments to ensure comfort throughout. Dental anxiety is a recognised barrier to seeking care, and the practice acknowledges that feeling informed and at ease plays a significant role in how patients experience their treatment. Taylored Dental Care Keighley can be contacted directly to arrange an implant consultation or ask questions before an appointment.
